## PRODUCTION OF PHARMACEUTICALS DECREASES

The Conference of the Central Committee, Trade Union of Chemical Industry Workers was convened on 27 June. M. V. Shchegolev, P. I. Gerasimov, V. V. Strukov and V. I. Antipov, engineer-technologists of the medical industry, submitted reports which described increased production due to the adoption of modern technological improvements. Antipov, who is assigned to the Moscow Salicylic Factory, stressed the importance of utilizing USSR resources. Shchegolev continued this same subject and stated that increased utilization of available resources would lead toward less expensive but higher quality products.

The ideas presented by the above engineers were lauded by Ikonnikov, Shchenev, Kukin, Churkin and Professor Magidson of the Moscow Chemical Factory; Denisov, chief, Administration of Chemiopharmaceutical Factories, Glavmedprom, and Semenov, secretary Central Committee, Trade Union of Chemical Industry Workers.

The Presidium of the Central Committee praised the achievements of the four engineers submitting reports and urged all factories to adopt their suggestions for shortening the production cycle. The Presidium further charged the scientific research institutes to aid factories in their economy program.
